

THE IMPACT OF CORROSION, SCALE DEPOSITS, AND MICROBIOLOGICAL GROWTH ON YOUR TOTAL COST OF OPERATION

Water systems are susceptible to corrosion, scale deposits, and microbiological growth – some systems more than others.

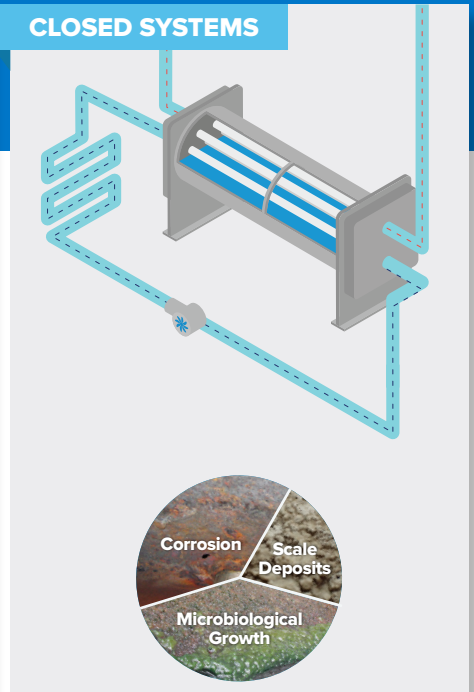

BOILERS

COOLING TOWERS

CLOSED SYSTEMS

THE IMPACT ON YOUR BOTTOM LINE

TOTAL COST OF OPERATION =

PRODUCTION COSTS

Downtime and Lost Productivity

+

ENERGY COSTS

Insulating Scale Deposits

+

WATER COSTS

Increased Usage Due to Low Cycles and Leaks

REPLACEMENT COSTS

Reduced Equipment Life

+

MAINTENANCE COSTS

Corrosion and Blockages

+

WATER TREATMENT COSTS

Corrective Mitigation
